

March 2022

To our clinician partners:

Thank you for being a part of the Molina family. As an expression of our gratitude, we are excited to introduce our capabilities with RubiconMD. RubiconMD is a web-based platform which provides specialty eConsults, connecting you to specialists in over 140 specialties and subspecialties.

Molina is offering access to RubiconMD to all of our primary care clinicians, and the platform can be used to benefit **all** patients at no cost to you or your patients. We hope this will help with better, faster access to healthcare for your patients.

An eConsult is a communication platform that connects primary care clinicians with top specialists who can help advise on a patient's care plan. You can use eConsults to:

- Receive feedback on a differential diagnosis or care plan
- Gain insights on an interim care plan (e.g. long patient wait time for a specialist visit)
- Help interpret a lab test or diagnostic result (e.g. slightly abnormal EKG)
- Improve the quality of referrals (e.g. appropriate workups completed)
- Answer general questions (e.g. COVID-19 patient assessment)

Molina is not engaged in treatment decisions, does not advocate for any course of treatment and takes no responsibility for RubiconMD's performance of eConsults or any clinical guidance provided. Provider must use its own reasonable professional judgment in its use of eConsult and its application of the eConsult guidance provided to make clinical decisions.

To learn more, visit the RubiconMD support center [here](#) for an overview, a platform demo and to get started with RubiconMD.

If you are interested in registering, click [here](#). After registering, you will receive a welcome email as well as a separate email with a link to the RubiconMD welcome kit.

We hope to help your patients achieve more timely access to specialty care!

Thank you,

Tracey Green
CMO Molina Healthcare of Nevada
